Experience

Co-Founder & Full Stack Developer, Lulos - Colombia	Feb 2026 – Present
- Led end-to-end development of scalable web solutions, from project planning and implementation to deployment, performance optimization, and continuous improvement. - Delivered web development and digital transformation projects for clients including CIT Consultoría Integral de Tránsito, GastroGest Pro, and Tiffany Esthetic Group IPS. - Improved organic search visibility through technical SEO, local SEO, and performance optimization, achieving 48,000+ Google Search impressions, 708 organic clicks, and an average search position of 8.2.	
Full Stack Developer, Cloudnonic - Canada	Dec 2024 – Feb 2026
- Key part of the frontend development for a multi-tenant healthcare platform using React, TypeScript and Redux Toolkit, connecting patients, doctors, and providers, enabling appointment scheduling, resource matching, and telemedicine workflows across a complex medical ecosystem. - Built and scaled core features including appointment flows, patient data management, and role-based dashboards, managing complex application state with Redux Toolkit and TanStack Query for efficient data fetching and caching, and multi-role interactions (patients, doctors, assistants). - Improved performance and SEO by implementing SSR, optimizing rendering behavior (memoization, controlled re-renders), and enhancing Core Web Vitals across production applications. - Introduced Storybook-driven component architecture to improve UI consistency, enable isolated testing, and facilitate communication with non-technical stakeholders. - Built and maintained RESTful APIs and domain-driven backend modules with NestJS, PostgreSQL, and Prisma. - Mentored developers and reviewed code, standardizing best practices and improving code quality across projects. - Collaborated in English with international clients and Scrum teams on healthcare, government, and education projects. - Worked in an AI-first environment, leveraging LLM and MCP integrations to speed up delivery and build AI-powered features. - Participated in CI/CD pipelines and pull requests review process to maintain code quality and consistency across the team.	
Full Stack Developer, Vrband - Czech Republic	Feb 2024 – Nov 2024
- Designed and developed a SaaS marketing analytics platform aggregating data from multiple external APIs into a customizable dashboard, including authentication, subscription payments (Stripe), and user management. - Built the entire product independently from scratch, handling frontend, backend integration, and system architecture decisions. - Built and maintained ERP inventory, sales, billing, and user management modules, improving usability and modernizing the UI. - Integrated third-party services and banking APIs, handling secure authentication and complex API documentation. - Improved code quality by refactoring legacy patterns, reducing technical debt, and enforcing better architecture practices. - Built responsive, accessible interfaces with Vue.js, Laravel, and CSS, prioritizing scalability and maintainability.	
Front End Developer Intern, Endava - Colombia	Jul 2023 – Jan 2024
- Led frontend development for a retail/eCommerce marketplace web application, defining architecture, technologies, and implementation standards within a collaborative team environment. - Built accessible, responsive UI components for users to publish, browse, and manage product listings. - Collaborated in an agile team with developers and stakeholders, contributing to task planning and feature design. - Demonstrated strong ownership by independently driving decisions and delivering complete features from design to integration.	
Customer Service Associate, Teleperformance - Colombia	Sep 2021 – Dec 2021
- Handled ~70 Walmart (US) customer interactions daily, resolving issues in under 5 minutes on average with 4/5 satisfaction. - De-escalated high-pressure situations with upset customers through effective communication, empathy, and problem-solving. - Strengthened professional English communication skills in real-time, customer-facing scenarios.	

Education

Bachelor's Degree in Software Engineering, Universidad del Valle	December 2026
High School Diploma, Colegio Bilingüe Lacordaire	

Projects

Endava Marketplace: Retail Web Application (07/2023) - TypeScript, Vue.js, Vitest, Pinia, Sass
Portfolio: Website about me and showcase of projects (06/2022) - JavaScript, React.js, Three.js, Tailwind CSS
GoMedicus Group: Digi-physical platform integrating digital health services (02/2025) - Next.js, TypeScript, Motion, Tailwind CSS

Certificates

Full Stack Open: Full Stack web development certificate, University of Helsinki	March 2023
Scrum Foundation Professional Certificate: CertiProf	January 2023
EF Standard English Test: C2 Proficient	January 2023

Skills

Frontend: React, Vue.js, JavaScript, TypeScript, Next.js, Tailwind CSS, Sass, GraphQL, Vite, Three.js, Vitest, Redux, HTML, CSS
Backend: PHP, Laravel, Node.js, NestJS
Databases: MongoDB (NoSQL), PostgreSQL, MySQL
Cloud: Azure, AWS
Tools: Git, GitHub, WebStorm, Claude Code, Jira, Linear, Slack, Teams, Chrome DevTools, Figma
